Six reasons to choose Bluelite

- 1 ISO 9001 Quality Assured with 'no quibble' guarantee, chosen by police, fire and ambulance services
- 2 Produced & applied locally in Belgium with QR codes linked to online templates
- 3 Award-winning approved converter for Orafol, Avery Dennison & 3M
- 4 Hundreds of vehicle templates online: patrol cars, vans, control units, motor bikes and more
- 5 Secure online ordering & accounts detailing transaction history
- 6 Industry-leading 'crash repair' portal for fast livery parts replacement

Bluelite & Prior-Striping – A perfect partnership meeting the vehicle livery production and application needs of frontline emergency services fleets in Belgium and beyond...

Make us your first point of contact for battenburg livery kits and retroreflective graphics. We help safety and emergency vehicles stand out day and night, optimizing visibility and enhancing safety for crews and other road users.

The battenburg design meets the requirements of the Royal Decree, with the application of prismatic materials reflecting 90 percent of shone light back to its source. As a result, vehicles can be seen up to a distance of at least 500 metres. On vehicle rears, diagonally upright stripes in a herringbone pattern form a high visibility chevron design.

Contact us to find out more.

Seeing is believing...

The Original Battenburg
Vehicle Livery Company

Thirty years ago, Bluelite developed the original battenburg vehicle livery in partnership with the UK Police Scientific Development Branch.

Today, we continue to lead on its production and application for emergency services around the world.
