

SANTOS E-PATROL.

Rapid response with powerful electric assistance

Santos E-Patrol

For professionals who need to operate quickly and effectively in public spaces. Whether for enforcement, supervision or emergency response, the Santos E-Patrol enables rapid deployment in busy city centres as well as wide rural areas.

This e-bike combines the most powerful Bosch mid-drive motor with the trusted quality of the Patrol Bike — strong, low-maintenance and proven in practice for many years. Built for intensive daily use, with excellent riding characteristics that provide comfort and control during long shifts in demanding environments. Smooth to handle, powerful against headwinds and always ready for the next deployment.

Key benefits

- Excellent riding characteristics for comfort and control
- Ideally suited for intensive daily use
- Fully configurable to specific requirements
- Based on 20 years of Patrol Bike field experience
- Most powerful Bosch mid-drive motor with 750 Wh battery for extended range
- Durable and low maintenance
- Long service life ensures a solid investment
- Full service options available, including on-site maintenance

Santos E-Patrol

With Rohloff drivetrain and Bosch mid-drive motor

Powerful and well protected

Equipped with an integrated 750 Wh battery, easily removable from the side.

Electronic shifting

Comfortable controls for quick and smooth gear changes, even when stationary.

Safe and neutral handling, agile and fast

Sporty yet comfortable riding position. Handlebar height adjustable with Herrmans ergonomic grips and bar ends.

Everything within reach

Water-resistant police pannier with rail system, including rain cover, tool kit, puncture repair kit, tyre levers, aluminium pump and inner tube.

Strong & robust frame

With durable white powder coating, including corporate-style markings.

Optimal visibility

High-quality black SON lighting powered via battery or hub dynamo.

Rear carrier with rail system

27.5 / 28 inch hand-built wheels, extra strong

Includes bottle and bottle cage

Wide tyres

For improved grip, comfort and safety. They help absorb obstacles such as tram rails and provide more control during difficult manoeuvres, such as descending stairs.

Safety

Shimano XT disc brakes with comfortable four-finger brake levers.

Reliable shifting

Always the right gear thanks to the extremely wide range of the internal Rohloff gear system. Combined with a carbon belt drive for optimal protection against the elements.

Powerful Bosch mid-drive motor

Bosch Performance Line CX mid-drive motor (85 Nm) with internal steel gears for excellent pulling power and long service life. Smooth ride behaviour with custom riding modes available.
